DETAILED ACTION

Specification

1. The abstract of the disclosure does not commence on a separate sheet in accordance with 37 CFR 1.52(b)(4). A new abstract of the disclosure is required and must be presented on a separate sheet, apart from any other text.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-14 and 19 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7 and 11-17 of U.S. Patent No. 5,849,653. Although the conflicting claims are not identical, they are not patentably distinct from each other because the scope of the catalyst compositions overlaps with that of the claims of the patent. In claims 1 and 11 of the Patent, component (A) of the Patent overlaps with component (A) of the instant claims when A of formula (I) of the instant claims has the same meaning as Cp, and component (B) of the Patent overlaps with component (B) of the instant claims when w=3 and z=0 or w=2

and $z=1$ in the formula of (II) of the Patent. For example, the tris(2-phenylpropyl)aluminum is anticipated when $(CH_2-CR^4R^5R^6)$ is (CH_2-CHCH_3Ph) , 2-phenylpropyl, (see col. 5, lines 23-24), $w=3$, and $z=0$ in the formula of (II) of the Patent.

4. Claims 15-18 and 20-27 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5 and 9 of U.S. Patent No. 6,136,932. Although the conflicting claims are not identical, they are not patentably distinct from each other because the scope of the polymerization process overlaps with that of the claims of the patent for the similar analysis as shown above.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Dall'Occo et al. (US 6,136,932 and US 5,849,653 respectively).

Dall'Occo's teaching is relied upon as shown above. For the same analysis as shown above, Dall'Occo's teaching encompasses the instant claims.
